RE: Victim: DANIEL GAYLAND NELSON, 01-28-52

Offense: Homicide

Our Case #: 86-11850

Suspect #1 [redacted]

Suspect #2 [redacted]

Suspect #3 [redacted]

Dear Sir:

The evidence described below is forwarded ( ), enclosed ( ),  
for examination by the FBI Laboratory.

This evidence is being submitted in connection with an official  
investigation of a criminal matter. It was not, nor will it be,  
subjected to the same type of technical examination by other experts.

Sincerely,

ROBERT M. DODGE, SHERIFF  
SNOHOMISH COUNTY

STATEMENT OF FACTS

On 2-26-86, victim Daniel Nelson observed what he believed to be a burglary in progress at a neighbor's house. Victim Nelson pursued and apprehended two of the three burglary suspects (suspect [redacted] and suspect [redacted]).

b6  
b7C

Suspect [redacted] claims to have been "pistol whipped" by victim Nelson, with the .357 revolver and the 30-30 Winchester. Suspect [redacted] has injuries consistent with such a claim. Suspect [redacted] then "jumped" victim Nelson. Nelson, who was in possession of both weapons (.357 & 30-30) was then shot with the .357 in the head. Police officers arriving on the scene found the 30-30 (#6) on the body of Nelson, contaminated with blood. An empty 30-30 caliber casing (#1) lay near the body. The .357 revolver (#3) was found in a nearby residence loaded with items 3A, 3B, 3C, and 3D. Two additional fired .357 rounds (#32) were found in possession of suspect [redacted]. Suspects [redacted] hands were swabbed with sirche kits as was the hands of victim Nelson. The empty casings have not been swabbed. Item #3 and #48 were taken by the suspects during the burglary. Item #6 apparently belonged to victim Nelson.

b6  
b7C

b6  
b7C

b6  
b7C

LATENT EXAMINATION

Please attempt to locate latent fingerprints on the following items:

#1 30-30 RP Winchester Casing

#3 Long barrel Dan Wesson .357 revolver S# [redacted]

b6  
b7C

#3A Fired .357 Winchester Western Round

#3B Live .357 Winchester Western Round

#3C Live .357 Winchester Western Round

#3D Live .357 Winchester Western Round

#6 30-30 Winchester Mod. 94 S# [redacted]

b6  
b7C

#48 Savage 308 caliber Rifle Mod. 99E S# [redacted]

Bullet Lead-2-95-271889

Compare any latent fingerprints found to:

#51 Known inked impressions of victim Daniel Nelson

b6  
b7C

Known inked impressions of suspects [redacted] will soon be available and submitted.

b6  
b7C

SEROLOGY

Please examine and identify by type any body fluids (blood) on the following items:

- #3 Long barrel Dan wesson .357 Revolver S#
- #6 30-30 Winchester Mod. 94 S#  b6  
b7C
- #19 One pair of pants from suspect
- #21 One jacket from suspect  b6  
b7C
- #22 One pair of tennis shoes from suspect
- #30 One pair of blue jeans from suspect  b6  
b7C
- #31 One blue plaid jacket shirt from suspect
- #33 One pair Pro Wing tennis shoes and sock from suspect
- #34 Known blood from body of Daniel Nelson

Please compare any serology found with the known blood of victim Nelson.

It is possible that all of above items may be contaminated with serology from more than one person.

HAIRS AND FIBERS

Please examine the following items for hair and fiber evidence:

- #3 .357 long barrel Dan Wesson Revolver S#  b6  
b7C
- #6 winchester 30-30 Mod. 94 S#

Bullet Lead-3-95-271889

ELEMENTAL ANALYSIS

Please examine the following items and describe their relationship to each other.

#2 Small metal fragment

#3 Dan Wesson .357 revolver with broken front sight.

#16 Sirche Atomic Absorbtion kit from suspect

b6  
b7C

#17 Sirche Atomic Absorbtion kit from suspect

#37 Sirche Atomic Absorbtion kit from victim Nelson

#1 Empty 30-30 caliber casing

#3A Empty .357 Winchester casing

#32 Two empty .357 casings from jacket of suspect

b6  
b7C

#44 Bullet slug and fragment from head of victim Nelson

#3B Live .357 Winchester round

#3C Live .357 Winchester round

#3D Live .357 Winchester round

#40 Blue jacket from body of victim Nelson

Please examine #40 for unburned gun powder.

FIREARMS

#1 Empty 30-30 caliber Winchester casing

#6 Winchester 30-30 mod. 94 S#

b6  
b7C

#3 Long barrel Dan Wesson .357 S#

Bullet Lead-4-95-271889

#3A Empty .357 Winchester casing

#32 Two empty .357 casings

Please examine the above weapons to determine whether they are in proper working condition and compare known firing pin impressions with empty casings submitted.

Result of examination:

SEROLOGY:

Grouping tests conducted on the K1 blood sample from DANIEL GAYLAND NELSON and the human blood identified on the below-listed specimens disclosed the following:

<u>SPECIMEN</u>	<u>RESULTS</u>	<u>COMPARISON</u>
K1	"O, PGMSub 1+, EsD 1, GLO I 1, EAP BA, ADA 1, AK 1, Hp 2, Gc 1, Tf C, CA II 1"	
Q1	"PGMSub 1+, EsD 1, EAP BA, ADA 1, AK 1, Hp 2, Gc 1, Tf C, CA II 1 PEP A 1"	Consistent with victim.
Q1A	"O, ADA 1, Hp 2, Gc 1, PEP A 1"	Consistent with victim.
K3	"O, PGMSub 1+, EAP BA, ADA 1, AK 1, Hp 2, Gc 1, Tf C, CA II 1"	Consistent with victim.

Attempts to further characterize the above specimens were either inconclusive or precluded due to a limited amount of sample. A grouping test conducted on human blood identified on Q11 was inconclusive. No blood was identified on Q5 through Q8, Q11A through Q11D, Q12 through Q14A, K2 or K4.

It should be noted that the results of blood grouping tests and comparisons, as set forth above, do not constitute a basis for positive personal identification.

#### HAIRS AND FIBERS:

No hairs were found on K2 through K4.

No fibers like those in the Q5, Q6, Q11 and Q12 items of clothing were found on K2 through K4.

No apparent transfer of textile fibers was detected between Q1 and the suspects' clothing.

Textile fibers were removed from Q7, Q8, Q13 and Q14 and have been mounted on glass microscope slides for possible future comparison purposes.

#### GUNSHOT RESIDUE ANALYSIS:

Specimens Q3, Q4, Q9, Q10, Q17 and Q18 were analyzed for the elements antimony and barium. These elements are components of most primer mixtures and can be deposited on the hands when a firearm is discharged.

The amounts of antimony and barium detected on specimens Q3 and Q4 are significant. This is consistent with NELSON discharging a firearm or being in an environment of gunshot primer residue.

It should be noted that in an investigation of a shooting, the presence of gunshot primer residue on the hands of the victim does not exclude the possibility that the victim was shot at close range by another person.

The amounts of antimony and barium detected on specimens Q9, Q10, Q17 and Q18 are insignificant. Therefore, it could not be determined if [redacted] discharged a firearm or were in an environment where gunshot primer residue was present.

b6  
b7C

#### FIREARMS-TOOLMARKS:

Specimen Q2 is a .38 Special or .357 Magnum caliber copper-coated lead bullet that has been fired from a barrel rifled with six grooves, right twist. Although the rifling impressions in Q2 are the same as those produced by the K2 revolver, specimen Q2 does not bear any microscopic marks of value for identification purposes. Therefore, it could not be determined if Q2 was fired from K2.

The Q15, Q16 and Q20 cartridge cases were identified as having been fired in the K2 revolver.

The Q19 cartridge case was identified as having been fired in the K3 rifle.

Specimens Q21 through Q23 are .357 Magnum caliber cartridges that do not bear any microscopic marks of value for comparison purposes. However, the bullet portions of the Q21 through Q23 cartridges are the same in observable physical characteristics as the Q2 bullet.

Specimen Q24 is a portion of a front sight that was identified as having at one time been a part of and broken from the remaining front sight of K2.

The K2 through K4 firearms functioned normally when test fired in the Laboratory.

The areas around the holes in the Q1 jacket were microscopically examined and chemically processed for the presence of gunshot residues and some were found around the hole in the back collar area. If K2 was the firearm utilized, it was determined it was within two feet of Q1 at the time of firing.

You will be advised of the results of the latent fingerprint examinations in a separate report.

Laboratory examinations regarding the compositional analysis of Q2 and Q21 through Q23 are continuing. You will be advised of the results of those examinations and the disposition of the submitted items in a subsequent report.
